Education

Mapúa Malayan Colleges Laguna Expected Nov. 2026
Bachelor of Science in Information Technology
Academic Specialization: Cybersecurity (12-unit track completed Nov. 2025)

Experience

Concentrix Nuvali Apr. 2026 – Jul. 2026
IT Operations Intern

- Supported enterprise IT operations for more than 2,000 production workstations through deployment, maintenance, troubleshooting, operating system imaging, and workstation provisioning.
- Administered Active Directory user accounts, workstation configurations, and access permissions across enterprise environments.
- Diagnosed hardware, software, operating system, and network issues while performing software installation and patch management to minimize downtime.
- Improved endpoint security through BIOS configuration, device hardening, operating system updates, and compliance verification.

Projects

EcoScrap (Capstone) Flutter • Firebase • TensorFlow Lite

- Developed a logistics platform connecting residents, collectors, and junkshops to streamline recyclable waste collection and trading.
- Integrated Google Maps API to support pickup requests, route tracking, and material monitoring throughout the collection process.
- Designed and implemented role-based user management utilizing AES encryption with automated Personally Identifiable Information (PII) data purging.
- Trained and integrated a TensorFlow MobileNetV2 image classification model to recognize recyclable materials and assist with waste sorting.

Watch Inventory & Catalog System React • Spring Boot • PostgreSQL • Docker

- Developed a full-stack watch inventory and catalog platform using React/Vite, Java Spring Boot, REST APIs, PostgreSQL, and Hibernate/JPA.
- Built an administrative dashboard for watch creation, editing, deletion, inventory management, and sold-status tracking.
- Implemented JWT authentication and Spring Security to protect administrative API endpoints and manage authenticated access.
- Containerized the Spring Boot backend with Docker and deployed the frontend and backend using Vercel and Render with Supabase PostgreSQL.
- Configured production CORS, environment variables, React Router SPA rewrites, and separate frontend/backend deployments.
- Developed automated backend tests using Spring Boot Testing and an H2 in-memory database, achieving **27 passing tests with 0 failures**.

Chronicles – Historical Reference & AI Research Application Java • Spring Boot • RAG • Ollama • Supabase

- Developed a beta AI-powered historical research application using Retrieval-Augmented Generation (RAG) to generate context-aware responses grounded in retrieved historical references.
- Implemented a semantic retrieval pipeline using text embeddings and similarity-based search to retrieve relevant historical context for AI-generated responses.
- Integrated Ollama for local Large Language Model (LLM) inference and Supabase for reference storage and retrieval, supporting context-aware historical question answering.
- Built the backend using Java, Spring Boot, Maven, and REST APIs, integrating the Wikipedia API to retrieve supplementary historical reference material.
- Deployed the application using Vercel and Render, configuring frontend and backend services for production accessibility.

SecureAuth Next.js • TypeScript • PostgreSQL • JWT

- Developed a secure authentication system using Next.js, TypeScript, JWT, PostgreSQL, and HttpOnly cookies.
- Implemented password hashing, CSRF protection, secure session management, and server-side input validation.
- Built reusable authentication middleware for protected routes and server-side authorization.

Technical Skills

Frontend: React, Next.js, Vite, TypeScript, JavaScript, Flutter, HTML, CSS
Backend: Java, Spring Boot, REST APIs, PHP, .NET
Databases: PostgreSQL, MySQL, Firebase, Firestore, Realtime Database
AI: Retrieval-Augmented Generation (RAG), Text Embeddings, Semantic Search, Ollama
Security: Spring Security, JWT, HttpOnly Cookies, Password Hashing, CSRF Protection, AES Encryption, OWASP Secure Development
Cloud & Deployment: Vercel, Render, Supabase, Firebase, Google Cloud Platform, Docker
Testing & Development: JUnit, Spring Boot Testing, H2, Hibernate, JPA, Maven, Git, GitHub
Infrastructure: Windows Server, Active Directory, Linux, Virtual Machines

Certifications

- Google Cybersecurity Professional Certificate (2026)
- Cisco Cybersecurity Ethical Hacking (2025)
- Cisco CCNA: Introduction to Networks (2025)
- Cisco CCNA: Switching, Routing, and Wireless Essentials (2025)
- Google Cloud Computing Foundations (2025)
- Azure DevOps: Delivery and Managing Builds (2026)
- Linux File Management for DevOps (2026)
