Full-Stack Developer | Infrastructure & Security

EDUCATION

Mapua Malayan Colleges Laguna — Bachelor of Science in Information Technology
Completed Cybersecurity Specialization — November 27, 2025

CERTIFICATES

- Cisco Ethical Hacking (2025)
- Cisco CCNA: Introduction to Networks (2025)
- Cisco CCNA: Switching, Routing & Wireless Essentials (2025)
- Google Cloud Computing Foundations (2025)
- Google Cybersecurity Professional Certificate (2026)
- IBM Full Stack Developer Professional Certificate (In Progress)
- Azure DevOps: Delivery and Managing Builds (2026)
- Linux File Management for DevOps (2026)

CORE SKILLS

- **Cybersecurity:** Kali Linux, Penetration Testing Basics, Network Security, Cryptography and Cryptanalysis
- **Programming & Development:** C#, .NET Python, C++, Java, HTML, CSS, Flutter, REST APIs, TensorFlow
- **Databases:** PostgreSQL Firebase (Firestore & Realtime DB)
- **Systems Administration:** Linux Enterprise, Windows Server, Active Directories, Virtual Machines
- **Cloud Service:** Google Cloud Platform, Firebase services

EXPERIENCE

- Supported IT operations for 2,000+ production workstations, performing deployment, maintenance, troubleshooting, and system imaging to ensure operational readiness.
- Administered Active Directory user accounts, access permissions, and workstation configurations, maintaining secure and efficient user access.
- Diagnosed hardware, network, and operating system issues, minimizing downtime through timely troubleshooting, software installation, and patch management.
- Strengthened endpoint security by implementing BIOS configurations, device hardening, software updates, and compliance checks, ensuring adherence to organizational security standards.

PROJECTS

- **Capstone — Project: EcoScrap (Mobile Application)**
 - Developed a logistics platform connecting Residents, Collectors, and Junkshops to streamline recyclable waste trading.
 - Integrated Google Maps API for real-time pickup requests and material tracking from resident to junkshop.
 - Built a user management system with AES encryption and automated PII data purging.
 - Trained and integrated a TensorFlow MobileNetV2 image classification model to identify recyclable materials and support waste sorting.
- **API-Based Android & Web Systems**
 - Developed full-stack web and mobile apps (Twitter clone, marketplace platform) using PHP, MySQL, and RESTful APIs for secure authentication and CRUD operations.
 - Implemented core features including appointment scheduling and responsive UIs using JavaScript, HTML/CSS, Xamarin, and Android Studio.
- **SecureAuth**
 - Developed a secure authentication system using Next.js, TypeScript, and JWT with HttpOnly cookies.
 - Implemented OWASP-recommended security practices, including CSRF protection, password hashing, input validation, and secure session management.
